

YOUR MEDICAL RECORD

With effect from 1st November 2019, we will be sharing your full medical record with community services that you have been referred to or are receiving care from. This includes, for example, District Nursing and other community nursing teams, bladder & bowel services, podiatry etc.

Each service provider should ask your permission before entering into your care record.

Sharing your record enables safer practice and continuity of care.

You are free to deny consent at the point of being asked and also informing your GP surgery, who can code your record accordingly and block the sharing process.

Thank you
